# What is Cryptocurrency?

**Cryptocurrency** is a type of **digital or virtual money** that exists only online. It uses **cryptography** (advanced security technology) to keep transactions safe and to control the creation of new units.

Unlike traditional money (rupees, dollars), cryptocurrency is **not controlled by any government or bank**. It works on a **decentralized system** called **blockchain**.

## How does Cryptocurrency work?

- ✓ Transactions are recorded on a **blockchain** (a public digital ledger)
- ✓ Every transaction is **secure, transparent, and cannot be changed**
- ✓ People can send or receive crypto **directly**, without banks

# What is Forex Trading

**Forex Trading** (Foreign Exchange Trading) is the process of **buying and selling currencies** to make a profit. It is the **largest financial market in the world**, where currencies of different countries are traded 24 hours a day.

## How does Forex Trading work?

- ✓ Currencies are traded in **pairs**, such as **EUR/USD**, **USD/INR**, or **GBP/USD**
- ✓ You buy one currency and sell another at the same time
- ✓ Profit or loss depends on how currency prices move
